Brian Merriman

Senior Frontend Engineer | Frontend Software Engineer | Complex Data Applications

New York, NY | b@merriman.xyz | https://merriman.xyz | https://github.com/merriman-xyz

PROFESSIONAL SUMMARY

Senior frontend engineer building JavaScript applications for complex data and operational workflows. Primary frontend engineer during the first year of a JPMorgan Chase analytics workspace for large data sets; promoted to Lead Software Engineer (Vice President) after two years. Now building local-first software. Available now for full-time frontend roles in NYC, on-site, hybrid, or remote.

SKILLS

Programming: JavaScript (ES6+), SQL, HTML5, CSS3
Frontend: React, vanilla JavaScript, data visualization, frontend architecture, virtualized rendering, web performance optimization, state management, client-side caching
Data and Backend: Node.js, SQLite, IndexedDB, Dexie, REST API integration, WebSockets, local-first synchronization, data modeling
Engineering: Git, deployment

WORK EXPERIENCE

JPMorgan Chase | Lead Software Engineer (Vice President)
New York, NY | February 2025 - May 2026

- Promoted from Software Engineer III (Associate) to Lead Software Engineer (Vice President) in two years.
- Evaluated large language model (LLM) workflows for legacy application modernization and created reusable project guidance and user interface (UI) component constraints for AI-generated code.

JPMorgan Chase | Software Engineer III (Associate)
New York, NY | January 2023 - January 2025

- Served as primary frontend engineer during the product's first year, building a high-performance multi-grid analytics workspace on a small, fast-moving team.
- Enabled users to explore, join, pivot, and retrieve large server-held data sets.
- Implemented virtualized rendering, visible-window data fetching over WebSockets, client-side caching, and state management to keep every grid responsive.

OKG Tech | Software Engineer
New York, NY | March 2022 - December 2022

- Primary implementation engineer on a four-person team, developing an updated bus-ticketing system in React and Node.js.
- Developed scheduling, vaccination, appointment-reminder, and clinical-workflow features against eClinicalWorks and existing operational systems.

Yunshang Tea | Co-Founder
Zhejiang, China | September 2015 - November 2021

- Managed retail and wholesale operations for a specialty tea business.
- Built database workflows for inventory, sales, and business operations.

SELECTED PROJECTS

- **Ingrid (2026):** Built a local-first hierarchical grid application using JavaScript, IndexedDB, and Dexie for client-side persistence, with production cloud synchronization and subscription billing.
- **Showdown Elo (2026):** Built an automated nightly Major League Baseball (MLB) ratings publication using Elo to rate hitters and pitchers from plate appearances.

EDUCATION

Manhattan College | Bachelor of Arts (BA) in Computer Science
Bronx, NY | Magna cum laude | Phi Beta Kappa
