Brian Merriman

Senior Frontend Engineer | Complex Data Applications
NYC area | merriman.bt@gmail.com | 914-888-6931
Website: merriman.xyz

PROFESSIONAL SUMMARY

Senior frontend engineer building JavaScript applications for data analysis and business operations. Former Lead Software Engineer (Vice President) at JPMorgan Chase. Now building local-first software. Available now for full-time frontend roles in the US or Europe, on-site, hybrid, or remote.

SKILLS

Frontend: JavaScript, React, HTML/CSS, virtualized rendering, rapid prototyping
UI/UX: Design systems, component libraries, data visualization, UI/UX design
Data: SQL, SQLite, IndexedDB (Dexie), Node.js, REST APIs, WebSockets
Tools: Git, GitHub, Vite, npm, Chrome DevTools
AI Dev: Claude Code, Codex, agentic development, context engineering, guardrails

WORK EXPERIENCE

JPMorgan Chase | New York, NY | January 2023 - May 2026
Lead Software Engineer (Vice President) | February 2025 - May 2026
Software Engineer III (Associate) | January 2023 - January 2025

- Built and continued developing a multi-grid analytics workspace for large data sets, with a React shell around a vanilla JavaScript grid core. Primary frontend engineer in year one.
- Designed and built charting and data-manipulation interfaces to explore, join, and pivot data across grids.
- Kept large grids fast with virtualized rendering, on-demand loading of visible data over WebSockets, and client-side caching.
- Helped introduce AI-assisted development for the workspace. Guided coding agents with reusable project instructions and UI component standards.

OKG Tech | Monsey, NY
Software Engineer | March 2022 - December 2022

- Updated a bus-ticketing system for a health center, with a React frontend and Node.js backend.
- Built a scheduling system for the same health center, also in React and Node.js.
- Contributed improvements across several other projects.

Yunshang Tea | Zhejiang, China
Co-Founder | September 2015 - November 2021

- Managed retail and wholesale operations for a specialty tea business.
- Built database workflows for inventory, sales, and business operations.
- Co-designed the brand’s visual language across packaging, print, and mobile shop pages: merriman.xyz/yunshang

SELECTED PROJECTS

Ingrid (2026)

- Built Ingrid’s original codebase and subsequently extended it through AI-assisted development.
- Shipped a local-first grid app with a React shell and vanilla JavaScript editor core. Added multi-device sync and subscription billing.
- Directed development of an AI editing prototype within Ingrid. Users can preview AI-generated edits before applying them, then undo or redo changes.

EDUCATION

Manhattan College
Bachelor of Arts (BA) in Computer Science
Bronx, NY | magna cum laude | Phi Beta Kappa
