Professional Summary

Senior frontend engineer building and improving interactive web applications, from complex data interfaces to everyday business workflows. Former Lead Software Engineer (Vice President) at JPMorgan Chase. Available for full-time roles in the US or Europe, on-site, hybrid, or remote.

Work Experience

JPMorgan Chase · New York, NY
Lead Software Engineer (Vice President) · Feb 2025 – May 2026
Software Engineer III (Associate) · Jan 2023 – Jan 2025

- Built and continued developing a multi-grid analytics workspace for large data sets, with a React shell around a vanilla JavaScript grid core. Primary frontend engineer in year one.
- Designed and built charting and data-manipulation interfaces to explore, join, and pivot data across grids.
- Kept large grids fast with virtualized rendering, on-demand loading of visible data over WebSockets, and client-side caching.
- Helped introduce AI-assisted development for the workspace. Guided coding agents with reusable project instructions and UI component standards.

OKG Tech · Monsey, NY
Software Engineer · Mar 2022 – Dec 2022

- Updated a bus-ticketing system for a health center, with a React frontend and Node.js backend.
- Built a scheduling system for the same health center, also in React and Node.js.

Yunshang Tea · Zhejiang, China
Co-Founder · Sep 2015 – Nov 2021

- Managed retail and wholesale operations for a specialty tea business.
- Built database workflows for inventory, sales, and business operations.
- Co-designed the brand's visual language across packaging, print, and mobile shop pages: merriman.xyz/yunshang

Selected Projects

Ingrid · ingrid.tanji.systems · 2026

- Built a local-first grid app with a React shell and vanilla JavaScript editor core, then extended it with the help of AI coding agents, adding multi-device sync and subscription billing.

Anyi Data · anyi.tanji.systems · 2026

- A local analytics workbench that pivots, filters and sorts large data sets from your own files or public datasets in the browser; rows never leave the computer.
- Designed it and lead its development with the help of AI coding agents: a vanilla JavaScript virtualized grid with DuckDB-WASM running pivots as SQL; optional AI questions send column metadata, never rows.

Skills

Frontend: JavaScript, React, HTML/CSS, Tailwind CSS, virtualized rendering, rapid prototyping
UI/UX: Design systems, component libraries, data visualization, interaction design
Data: SQL, SQLite, IndexedDB (Dexie), Node.js, REST APIs, WebSockets
Tools: Git, GitHub, Vite, npm, Chrome DevTools
AI Dev: Claude Code, Codex, agentic development, context engineering, guardrails

Education

Manhattan College · Bronx, NY
Bachelor of Arts (BA) in Computer Science · magna cum laude · Phi Beta Kappa
